

Isn't it time?

~ A New Approach to
Health Care Coverage ~

The **NM Health Security Plan** will

- ensure that all New Mexicans have health care coverage
- offer freedom of choice of health care provider (no more networks)
- provide comprehensive benefits, including mental health
- be cost-effective (low overhead, negotiated drug prices) and affordable
- enable providers to focus more on patient care
- be run by a geographically representative citizens commission with open meetings and open books (full transparency)
- shift private insurance to a secondary role

NM Health Security Act

Today in New Mexico:

- 13% of adults under age 65 are uninsured, and many others are underinsured
- 50,000 New Mexicans are at risk of losing coverage as politicians in DC threaten the stability of state health insurance exchanges
- having numerous different plans makes health care more complex, less efficient, and more expensive for patients and providers
- prescription drug prices continue to rise dramatically
- premiums continue to climb (NM employees pay the second highest premiums in the nation relative to their income)
- out-of-pocket costs continue to increase

There's a better way.

www.nmhealthsecurity.org

It's time to set up our own health plan in New Mexico, run like a co-op, with freedom of choice of provider and a comprehensive benefits package.
